Yaye Fatou GUEYE

Cybersecurity · Fraud & AML/KYC Compliance · Mobile Money Security · IT Support

CORE SKILLS

Mobile Money fraud
SIM swap detection, heuristic rules, ML scoring

AML/KYC compliance
KYC / KYB, sanctions screening, FIU (CENTIF) reporting

SOC & networking
Wazuh, FortiGate, IPsec VPN, VLAN, IT support

Audit & GRC
ISO 27001 / 22301, internal control, DRP

LANGUAGES

French — native

English — advanced (C1)

Wolof — fluent

CYBERSECURITY

SOC, SIEM & incident response

Networking: IPsec VPN, VLAN, ACL/NAT

Pentest, reverse engineering, CTF

Application & API security (OWASP)

COMPLIANCE & RISK

KYC / KYB / KYAgent, AML/CFT

Screening: PEP, OFAC, EU, UN; CENTIF

Internal control, process audit

ISO 27001 / 22301, BCEAO, FATF, PCI-DSS

TOOLS

`Wazuh` `FortiGate` `Kali Linux` `Packet Tracer` `Windows Server` `Python` `PostgreSQL` `Docker`

PROFILE

KYC / Compliance Analyst at Société Générale Senegal, with prior fraud-prevention experience at Wave. I combine **AML/CFT compliance** and **cybersecurity** (SOC, ISO 27001 audit, application security) to protect mobile payments across the WAEMU region. **1st place at the Lamb Tech competition** (Xibaar AI SOC platform) and **Top 10 at the WICE CTF**.

PROFESSIONAL EXPERIENCE

KYC / Compliance & Risk Analyst — 2026

Société Générale Senegal

- **KYC reviews** of client files within a strict regulatory framework (BCEAO, FATF).
- **Client risk analysis** ; contribution to fraud and money-laundering prevention (AML/CFT).
- Took part in assessing the **internal control framework** and auditing operational processes.
- Worked with the **IT, Compliance and Operations** teams to secure business processes.
- Contributed to **regulatory compliance** with international requirements.

Fraud & IT Risk Intern — 2025

Wave Mobile Money Senegal

- **IT and client risk assessment** : critical assets, exposure levels, operational vulnerabilities.
- Defined heuristic rules to detect **SIM swap fraud** (SIM change, reissued subscription, device reconnection) cross-checked against Mobile Money transaction patterns.
- Implemented **internal control mechanisms** to secure operations and reduce regulatory risk.
- Monitored **AML/CFT indicators** and contributed to reports filed with CENTIF (Senegal's FIU).
- **KYC / KYB / KYAgent** procedures (identity, due diligence, documents) and **sanctions screening** of clients and partners (PEP, OFAC, EU, UN).
- With IT and security teams: **access and incident management**, strengthening the security posture.
- Updated **policies and procedures** for compliance, security and risk management.

EDUCATION

Bachelor's in Cybersecurity & Computer Science

BTS (2-year technical degree) — Highest honours

CERTIFICATIONS

Cisco CCNA 1
Obtained, 2025

CompTIA Security+ training
GoMyCode — completed, 2025

CompTIA Security+
Official exam in progress

Cisco CCNA 2 & 3
In progress

ISO 27001 Fundamentals
In progress

IELTS — English C1
In progress

ADDITIONAL TRAINING

IT Audit & Governance

Compliance and anti-money laundering (AML/CFT)

Risk management and fraud prevention

STRENGTHS

Analytical mind and technical rigour

Autonomous and proactive in demanding environments

VOLUNTEERING

Active member of the Cyber221 association: cybersecurity awareness on LinkedIn

INTERESTS

Logic and strategy games:

`Chess` `Sudoku` `Puzzles` `Crosswords`

THESIS PROJECT

SécuriPay-AI

`Python · FastAPI · scikit-learn · PostgreSQL · Docker`

- **5-check webhook pipeline** (IP allowlist, HMAC-SHA256, anti-replay, 5-min window, double verification): forged webhooks rejected in under 100 ms.
- **SIM swap detection** (24 h Bank-to-Wallet block), suspicious withdrawals and anti-phishing.
- **Adaptive KYC** (0–100 score, AML screening) and hardened API: JWT, rate limiting, HSTS / CSP headers.
- **Hybrid fraud scoring** (business rules + Random Forest), client and analyst dashboards, BCEAO / PCI-DSS compliance report in PDF.

71	0.93	< 90 ms	5
unit tests	F1-score	webhook validation	modules

ACADEMIC PROJECTS — CYBERSECURITY & IT AUDIT

Xibaar AI — 1st place, Lamb Tech competition

`Elastic Stack · Node.js · React · Docker`

- AI-assisted SOC platform, built in a team of two. **I designed the entire SOC component** : Winlogbeat → Logstash → Elasticsearch / Kibana.
- Detection of critical events (failed logons, account creation, PowerShell) and **MITRE ATT&CK mapping** across 15 techniques with severity levels.
- Express API (JWT, bcrypt), React dashboard, nmap network discovery and an **AI assistant** to analyse logs and scans.

SOC & cyber defence lab

`Wazuh · FortiGate · Kali · Ubuntu`

- Deployed a SOC simulating intrusion detection and incident response in an enterprise environment.
- Site-to-site IPsec VPN (FortiGate), ACL/NAT, routed and segmented topologies (VLANs, subnets) in Packet Tracer, device hardening.

ISO 27001 audit — banking sector

`ISO 27001 · ISO 22301 · Windows Server`

- Security audit of a simulated banking environment: risk mapping, control assessment, ISO 22301-compliant disaster recovery plan.
- Wrote security policies, encryption strategies and an awareness programme.

XOR_MUTATOR & CTF

`Python · reverse engineering`

- XOR_MUTATOR: binary manipulation tool for fuzzing and binary patching; Python scripts for network scanning and port analysis.
- **Top 10 at the WICE CTF** : reverse engineering and security challenge solving.

OTHER GITHUB PROJECTS

Secure web application & pentest (PHP) · Containerised CRUD application with CI/CD (Docker Compose, GitHub Actions) · Brazil Burger, online ordering (PHP/MySQL).
